Notes: The imitation Ponde were used as gaming counters.

There are 13 known varieties of the 1 Pond imitation. Paul Withers has numbered these 2-14 (1 being for the 1/2 Pond) numbering has been used here.

The varieties have been made from combinations of 10 different obverse die types and 8 different reverse die types. The types have been numbered; 1-10 in the obverse description and 1-8 in the reverse description. The differences are some minor.

The imitation Ponde were not well made. The composition of the alloy, the diameter and the weight vary considerably.
